DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 9, filed 11 January 2007, with respect to the rejection(s) of claim(s) 15-16 under 35 USC§102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 USC§112.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 23 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims state cardiovascular disorders can be treated using medicament containing the instant compounds. Yet there is no indication what theses cardiovascular disorders are and that the instant compounds can actually be use. Applicant cites WO-01-19780 as a reference to cardiovascular disorders yet does not list the actual disorders in the specification. While one can go to another source outside the specification

Art Unit: 1621

for information, essential material such as the cardiovascular disorders treatable by medicaments containing these compounds must be in the instant specification.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 22-23 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Both claims 22& 23 are rendered indefinite by depending from canceled claim 15, therefore the metes & bounds of these claims cannot be determined.

6. Claim 22 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the require steps needed to obtaining the active ingredients for medicaments.

Claim Objections

7. Claim 23 objected to because of the following informalities: Applicants should review the claim for incorrectly spelled words. Appropriate correction is required.

Specification

8. The incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication is improper.

Art Unit: 1621

Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

Allowable Subject Matter

9. Claims 1-12 are allowed.
